Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a purchasing system, classified in class 705, subclass 27.
 - II. Claims 19-31, drawn to an auction method, classified in class 705, subclass 37.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, invention has separate utility such as:

Inventions I and II have separate utility such as: the invention I drawn to a purchasing system in which the purchaser searches for a product and stores the results of searching in a profile, in contrast, the invention II drawn to an auction method in which the bidder places a bid for a product at many auction sites. Therefore, the invention I and II are shown to be separately usable.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
